UNUSUAL FIRE AND EXPLOSION HAZARDS:

Keep containers tightly closed. Isolate from heat, electrical equipment, sparks, and open flame. Closed containers may explode when exposed to extreme heat. Do not apply to hot surfaces. Water spray may be ineffective. Water may be used to cool closed containers to prevent pressure buildup and possible autoignition or explosion exposed to extreme heat. If water is used, fog nozzles are preferable.

SECTION 5 --- HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

Inhalation: Anesthetic. Irritation of the respiratory tract or acute nervous system depression characterized by headache, dizziness, staggering gait, confusion, unconsciousness or coma. Skin or eye contact: Primary irritation. Contains lead. The physician should be so advised. Repeated and prolonged overexposure by ingestion may cause delayed damage to blood, gastrointestinal, nervous and reproductive systems.

MEDICAL CONDITIONS PRONE TO AGGRAVATE BY EXPOSURE:

N/A

PRIMARY ROUTE(S) OF ENTRY:

Dermal, inhalation and ingestion.

EMERGENCY AND FIRST AID PROCEDURES:

Fumes: Remove from exposure. Restore breathing. Keep warm and quiet. Notify a physician. Splash (Eyes): Flush immediately with copious quantities of running water for at least 15 minutes. Take to a physician for definitive medical treatment. Splash (Skin): Remove with soap and water. Remove contaminated clothing. Do not induce vomiting if swallowed.

Hazardous decomposition products:

May produce hazardous fumes when heated to decomposition as in welding. Fumes may contain carbon monoxide and oxides of nitrogen. In the event of fire, lead oxide may be produced.

HAZARDOUS POLYMERIZATION:

Will not occur.

OTHER COMMENTS:

N/A

SECTION 7 --- SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

Remove all sources of ignition (flames, hot surfaces, and electrical, static or frictional sparks). Avoid breathing vapors. Ventilate area. Remove with inert, absorbent and non-sparking tools.

WASTE DISPOSAL METHOD:

Dispose of in accordance with applicable local, county, state and federal regulations. Do not incinerate closed containers.

OTHER COMMENTS:

SECTION 8 --- SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:

In outdoor or open areas, use Mine Safety and Health Administration (MSHA), or National Institute for Occupational Safety and Health (NIOSH) approved mechanical filter respirator to remove solid airborne particles of overspray during spray applications. In restricted ventilation areas, use MSHA or NIOSH approved chemical-mechanical filters designed remove a combination of particulate and gas and vapors. In confined areas, use MSHA or NIOSH approved airline type respirators or hoods.

ENTITLED TO:

Provide general dilution or local exhaust ventilation in volume and pattern to keep TLV of most hazardous ingredient in Section II below acceptable limit, LEL in Section IV below stated limit, and to remove decomposition products during welding or flame cutting on surfaces coated with this product.

PROTECTIVE GLOVES:

Solvent resistant gloves required for prolonged or repeated contact.

EYE PROTECTION:

Use safety eyewear designed to protect against splash of liquids.

CLOTHING PROTECTION:

Prevent prolonged skin contact with contaminated clothing.

HYGIENIC PRACTICES:

Wash with soap and water before eating, smoking, or using toilet facilities.

OTHER COMMENTS:

N/A

SECTION 9 --- SPECIAL PRECAUTIONS

CAUTIONS TO BE TAKEN IN HANDLING AND STORING:

Do not store above 120 degrees F. Store large quantities in buildings designed for storage of NFPA Class IB flammable liquids.

OTHER PRECAUTIONS:

Do not take internally. Containers should be grounded when pouring. Avoid free fall of liquids in excess of a few inches. Do not flame cut, braze, or weld without MSHA or NIOSH approved respirator or appropriate ventilation.

OTHER COMMENTS:
